

Mini Wi-Fi Smart Plug

Product Highlights

**Compact Size**

Won't block nearby outlets

**On/Off Control from Anywhere**

Turn your home appliance on and off from your phone

**Automatic Scheduling**

Turn on/off your home appliance based on time/date schedules

Your Home, Only Smarter

The DSP-W118 Mini Wi-Fi Smart Plug is a versatile and easy-to-use device that allows you to monitor and control an electrical appliance from wherever you are. Its compact size lets you inconspicuously build a connected home and the legible LED lets you know the status at a glance. Scheduling provides a helpful way to save power while you're at work or asleep, and the mydlink app provides an easy way to set up alerts or manually power a device on or off, giving you peace of mind – anytime.

Smart, Compact Design

The DSP-W118 Mini Wi-Fi Smart Plug is designed to fit into any home decor inconspicuously. The compact design means that it won't obstruct other electrical sockets next to it. A LED at the top-right corner of the device lets you quickly see the device status at a glance from across the room.

Control Your Appliance from Anywhere

With the DSP-W118 Mini Wi-Fi Smart Plug, you can control the attached electrical appliance in your home while you're away. Set a schedule that turns your TV off when you're asleep, power on your coffee maker before you wake up, or automatically turn on your living room lamp while you're on vacation. The mydlink app lets you remotely switch your appliances on or off from your mobile device and manage your power schedules while on the go.

Easy to Set Up

The DSP-W118 lets you connect any electrical appliance for control via your smart home network. Just plug it into a wall outlet then plug a device into the power socket. Fire up the mydlink app on your mobile device to add the Mini Wi-Fi Smart Plug to your smart home network. You can also set schedules and automate your appliances, as well as set automation rules that interact with other mydlink devices.

Features

- ◆ Wireless 802.11n
- ◆ Power scheduling
- ◆ Smart remote power control
- ◆ Automation
- ◆ Cable-free installation
- ◆ Firmware over-the-air upgrades
- ◆ Works with, Amazon Alexa and the Google Assistant¹
- ◆ mydlink™ app support

Get Instant Notifications Wherever You Are

Once your DSP-W118 is a part of your smart home network, you'll be able to configure push notifications. Once you have set up a rule, it will send customizable notifications to your mobile device depending on a trigger such as when a device is switched on or off. Now you can get on with your day without worrying or needing to constantly check on things.
